

The context

15 million

People will not have access to safe drinking water this year.

3.1 million

People are suffering from malnutrition.

600,000

Children under five are facing severe acute malnutrition.

Severe drought in the Horn Africa has left millions of people in Ethiopia, Somalia and Kenya in desperate need of food and drinking water. Continued lack of rainfall, insecurity and lack of access mean Somalia is at particular risk of famine in 2017.
